

AVISEK SAHOO

Senior Software Engineer — React Native & Mobile AI

Odisha, India | +91 8637222653 | sahooavisek41@gmail.com | imavisek.netlify.app

SUMMARY

Senior Software Engineer with 5+ years building production React Native apps, specializing in on-device AI/LLM integration, OTA release pipelines, and mobile performance optimization. Shipped a privacy-first offline AI app to the Play Store, cutting APK size by 75% and AI response latency by up to 4x. Led cross-functional delivery and mentored junior engineers.

SKILLS

Languages: TypeScript, JavaScript (ES6+)
Frameworks & State: React Native, Expo / EAS, Zustand, TanStack Query, Redux Toolkit
AI / LLM: On-device inference (llama.rn), prompt & latency optimization, RAG basics
CI/CD & Tooling: EAS Build/Update, OTA releases, Fastlane basics, GitHub Actions, Firebase
Architecture: Clean Architecture, modular mobile codebases, performance profiling

EXPERIENCE

Senior Software Engineer — York IE, Ahmedabad May 2023 — Present

- Architected and shipped Vaani, a privacy-first offline AI chat app for Android (React Native, Expo SDK, on-device LLM via llama.rn); reduced APK size from ~200MB to ~50MB (75% reduction) and cut AI response latency from 1-2 minutes to 15-30 seconds through system prompt optimization.
- Built OTA release pipeline using EAS Update with fingerprint-based runtime versioning and QA/UAT/Production build profiles, cutting release turnaround for JS-only changes and removing manual store resubmissions.
- Designed a server-driven dynamic UI system for a large-scale sports app supporting 108 unique UI combinations across city, time-of-day, salary cycle, and festival dimensions.
- Implemented a backend-driven force-update system and FCM push notification handling across multiple screen types, and optimized overall application performance by 30%.
- Led cross-functional delivery across design, backend, and QA to ship high-impact mobile releases on schedule.

Senior Software Developer — SearchingYard Software Pvt. Ltd., Bhubaneswar Feb 2021 — Apr 2023

- Designed and built core React Native components — tab bars, map view, image picker, document picker, and push notifications — used across the production app.
- Built a responsive scaling system (custom useScale hook) to standardize UI across phone and tablet layouts.
- Evaluated and implemented CI/CD tooling (EAS vs. Bitrise) for a bare React Native project, and mentored junior developers on React Native architecture and best practices.

EDUCATION

MCA (Master of Computer Applications) — Gandhi Institute For Technology, Bhubaneswar 2021

B.Sc. Computer Science — Chitalo Degree Mohavidyalaya, Jajpur 2018

PROJECTS

Vaani — Offline AI Chat App (Android, Play Store)

- Independently built and published a fully offline, privacy-first AI assistant for Android students (UPSC/NEET/JEE) — no data leaves the device. React Native 0.85, Expo SDK 56, Zustand, Clean Architecture.

FutureOne Sports — Tournament Compliance & Operations App (iOS / Android)

- Built a real-time player check-in system for youth sports tournament organizers, replacing paper roster books with single-tap check-in and a full audit trail (user and timestamp logged for every action).
- Implemented a three-tier eligibility engine — SportsPass document verification, roster confirmation, and event eligibility — surfacing real-time eligible / pending / ineligible status with clear reasons for coaches and administrators.

SubItUp Mobile — Shift Scheduling App (iOS / Android, 10,000+ downloads)

- Built the mobile companion app for SubItUp's workforce-scheduling platform, letting users view their work schedule and submit Add, Drop, or Swap shift requests to coworkers directly from their phone.
